Eurotherapy Health Products

For 25 years Eurotherapy has been providing products to help satisfied customers to recover from a range of health conditions and ailments.

Originally designed for use by many health professionals, Eurotherapy brings a new range of oscillating-pad therapy and hydrotherapy products to the UK, for use in your own home.

Demonstrations are available for you either at home or at over 50 retail events or exhibitions, where we can explain how our products may be able to help you, and give advice to treat your specific health conditions and ailments.

Introducing the Eurotherapy Classic

When you're suffering from a bad back, painful joints or arthritis, getting out to see your health professional is not always easy. Now, with the Eurotherapy Classic, you can sooth away aches and pains in your home.

The Eurotherapy Classic is our unique oscillating-pad hand-held product, developed by German experts and designed for the health professional market.

Weighing just 1.4kg (3 lbs) with a sturdy 1.3kg carry case, this lightweight, robust, mains powered product offers comfortable hands-free treatment of hands, feet, shoulder, neck, back, hip, knee or joints.

It comes with a whole range of accessories and the option of adding heat, which quickly reaches 40°C for gentle localised muscle and soft tissue therapy.

You can see the Eurotherapy Classic in action and try it out for yourself at one of 50 events across the UK, or it can be bought directly from us online.

Eurotherapy Classic

PRODUCT FACT SHEET

Conditions the Classic could help with

No-one can guarantee an instant fix for complex and incurable medical problems, such as the many types of arthritis for example. However, our experience and oscillating-pad therapy knowledge has enabled us to help Eurotherapy Classic users of all ages to get back to a more mobile, pain-free and active life.

Here are some of the benefits that our users have said they have gained by using the Classic regularly.

In fact many customers have said the Eurotherapy Classic has been beneficial for a range of conditions.

These benefits include relief from arthritis, back and neck ache, bursitis, high blood pressure, cellulite, cramps, diabetes, fibromyalgia, gout, osteoarthritis, migraine treatment, prostate issues, polymyalgia, tension, sciatica, carpal tunnel syndrome, tinnitus, trapped nerves and tennis and golfer's elbow.

"I use my Eurotherapy Classic daily, usually before getting up in the morning. I have found it such a help to keep my osteoarthritic joints mobile. I was told I needed a second knee replacement but six years later I still do not need the operation."

Mr M K Crundwell

Using the Eurotherapy Classic at home

The carry case can hold the Eurotherapy Classic securely in a number of positions, allowing you to continue with your normal activities of watching television, reading or home handicrafts. The balanced ergonomic design allows for convenient, easy one-handed use and a range of accessories can tailor treatment to your exact requirements.

The powerful 45 Watt motor oscillates at 2,870 rpm and yet is quiet enough not to be intrusive to others.

A number of special attachments allow for a range of therapeutic uses from scalp, cosmetic soft tissue and reflexology use to deep penetrating massage.

The soft bristle pad and ball studded reflexology pad both attach by simply placing them over the base plate and allowing the sides to locate in a groove.

The cosmetic sponge, soft bell, and domed deep penetration attachments all locate in a high quality stainless steel threaded insert in the base plate.

The coiled mains power cable stretches to a length of 3m (10 feet) for convenient use without having to be immediately next to a power socket. When not in use the power lead will recoil to its original length.

The Eurotherapy Classic is light enough for easy transportation, yet sturdy enough for effective use. Its convenient weight and size does not impair its performance, as many professional users will attest.

A useful hand grip is moulded into the front of the product for two handed use, should you require the services of an assistant, a feature appreciated by the many qualified physiotherapists that use the Classic.
